

RIO JONATHAN

Vancouver, BC

☎ 236-978-0180 ✉ rionduljonathan@gmail.com www.linkedin.com/in/rio-jonathan/

Education

University of British Columbia

Bachelor of Applied Science, Environmental Engineering

Sept. 2025 – Apr. 2029

Vancouver, BC

Experience

Product Strategy Intern

Riipen

Mar. 2026 – Apr. 2026

Vancouver, BC

- Led a 5-member team to implement solutions for startup companies, including HTML website design, grant eligibility research, and digital platform expansion by 15%.
- Increased funding and member acquisition for employers by designing roadmaps and Power BI analytics dashboards.
- Communicated directly with CEOs and stakeholders to analyze in-depth user feedback and ship requested features tailored toward solving user pain points and increasing visibility.

Co-Lead for Marketing and Software

UBC Sustainengineering Design Team

Jan. 2026 – Present

Vancouver, BC

- Produced promotional materials and coordinated outreach campaigns across digital platforms to increase team visibility and support recruitment of 50+ prospective members and new sponsorships.
- Optimized team website UI/UX through Figma and WordPress by shipping 3 requested features gathered from user feedback. Increased follower count and engagement by 25% across media accounts.
- Conduct LCAs and integrate Python weather-monitoring software into sustainable mobile research testbeds (SMRTs).

Co-Founder and Marketing Head

Medical Envoy's for Community Health (M.E.C.H Nonprofit)

June 2023 – Aug. 2025

Vancouver, BC

- Managed digital platforms and designed fundraising content with Canva to raise over \$3000 for hospital foundations and facilitate recruitment of 15+ members across BC and PEI.
- Visualized complex health statistics and posted awareness materials to optimize community engagement.

Health Ambassador

Fraser Health and PCRS V.A.P.E Program

Feb. 2024 – June 2024

Vancouver, BC

- Analyzed clinical vaping research from Fraser Health databases to present and teach 120+ elementary students across 3 schools on vaping awareness. Translated health data into an accessible presentation for a wide demographic.

Projects

Engram | *React, TypeScript, Three.js, RAG, Supabase, Vercel, ElevenLabs, FastAPI* TechTO x Althra Hack Finalist

- Built a persistent AI memory layer connecting 8+ workspace tools (Confluence, Slack, Jira, Google Drive) into a semantically indexed RAG knowledge graph, cutting cross-tool information retrieval time by an estimated 40% for users during testing.
- Engineered a FastAPI ingestion pipeline processing 100+ documents into vectorized embeddings, enabling sub-2000ms semantic query responses via voice or text through a custom ElevenLabs TTS integration.
- Designed a React + Three.js frontend rendering a live 3D semantic graph of indexed document nodes, and deployed the full stack to production on Vercel with secure Google OAuth via Supabase, reaching the top 5 of 20+ competing teams.

Metal Claw | *C, Arduino, Servo/Sonar Integration, AutoCAD*

UBC APSC 101

- Designed and CAD-modeled a two-arm robotic claw system in AutoCAD, optimizing weight distribution and grip surface geometry to lift payloads exceeding a maximum of 500 grams without slippage.
- Programmed Arduino microcontroller firmware in C to interface servo motors with an ultrasonic sonar sensor, achieving real-time object distance tracking within a 5–15 cm range at 0.5 cm accuracy for automated claw movement.

Technical Skills

Languages & Computation: Python, C++, C, HTML, TypeScript, VBA, MATLAB, Ansys, Git, RAG Pipelines, AI API Integration, Supabase

CAD & Web Development: AutoCAD, SolidWorks, Figma, React, Next.js, Node.js, Docker, Vercel, WordPress, Power BI, Canva, MS Office

Certifications: Technical Product Management, Product Strategy & Roadmaps, AutoCAD 2026, Python Data Analysis, Power BI Dashboards, WordPress SEO
