

RIO JONATHAN

Vancouver, BC | Environmental Engineering, University of British Columbia

236-978-0180 | rionduljonathan@gmail.com | <https://www.linkedin.com/in/rio-jonathan-03060331b/>

TECHNICAL SKILLS:

Computation: Python, C++, C, HTML, TypeScript, VBA, MATLAB, Ansys, Supabase, Git, RAG pipelines, AI API integration.

Design: AutoCAD, SolidWorks, Power BI, WordPress, MS Office, Canva, Figma, React, Next.js, Node.js, Docker, Vercel.

Certifications: Technical Product Management, Product Strategy/Roadmaps, AutoCAD 2026 Training, Python Data Analysis, Power BI Dashboards, Docker Foundations Professional, Technical WordPress SEO.

EDUCATION:

University of British Columbia

Vancouver, BC

Bachelor of Applied Science, ENVL Engineering

Sept 2025 – Apr 2029

EXPERIENCE:

Product Strategy Intern

Mar 2026 – Apr 2026

Riipen

Vancouver, BC

- Led a 5-member team to implement solutions for startup companies, including **HTML website design**, **grant eligibility research**, and digital platform expansion by 15%.
- Increased funding and member acquisition for employers by designing **roadmaps** and **Power BI analytics dashboards**.
- Communicated directly with CEOs and stakeholders to analyze in-depth user feedback and ship requested features tailored toward **solving user pain points** and optimizing visibility.

Co-Lead for Marketing and Software

Jan 2026 – Present

UBC Sustaingineering Design Team

Vancouver, BC

- Produced promotional materials and coordinated outreach campaigns across digital platforms to increase team visibility and support recruitment of **50+ prospective members** and new **sponsorships**.
- Optimized team **website UI/UX** through **Figma** and **WordPress** by shipping 3 requested features gathered from user feedback. Increased follower count and engagement by 25% across media accounts.
- Conduct **LCAs** and integrate **Python weather-monitoring software** into sustainable mobile research testbeds (SMRTs).

Co-Founder & Marketing Head

June 2023 – Aug 2025

Medical Envoys for Community Health (M.E.C.H Nonprofit)

Vancouver, BC

- Managed digital platforms and designed fundraising content with Canva to raise over **\$3000** for hospital foundations and facilitate recruitment of **15+ members** across **BC and PEI**.
- Visualized complex health statistics and posted awareness materials to optimize community engagement.

Health Ambassador

Feb 2024 – June 2024

Fraser Health and PCRS V.A.P.E Program

Vancouver, BC

- Analyzed clinical vaping research from Fraser Health databases to present and teach **120+ elementary students** across 3 schools on vaping awareness. Translated health data into an accessible presentation for a youth demographic.

PROJECTS:

Engram (TechTO x Althra 2026 Hack Finalist) | React, TypeScript, Three.js, RAG, Supabase, Vercel, ElevenLabs, FastAPI

- Built a persistent memory platform with custom **AI voice pipeline** that connects **8+ workspace apps** into a semantically indexed knowledge graph, instantly queryable via voice or text. (Confluence docs, Slack threads, Jira tickets, Google Drive)
- Engineered **FastAPI ingestion pipeline** wired to a **React + Three.js frontend** rendering a **3D live semantic graph**. Deployed via Vercel and integrated with Google OAuth via Supabase.

Metal Claw (UBC APSC 101 Course Module) | C Programming, Arduino, Servo and Sonar Integration, AutoCAD

- Designed a physical two-arm **jaw system with AutoCAD**, optimizing weight distribution and grip surfaces for payloads.
- Programmed **Arduino microcontroller firmware** to interface servo motors and sonar sensors for real-time distance tracking.
